

## **The Tampa Bay Fly Fishing Club**

**[www.tbffc.org](http://www.tbffc.org)**

**Next Meeting: Wednesday, October 1, 2008, 6:00 p.m.**

**Location: Compton Park Recreation Center, Tampa Palms (See below for Directions)**

### **Invited Speaker**

**Walt Durkin**

Former club president Walt Durkin grew up in West Palm Beach and has fished on and off all his life, including through a 24-year Army career. He returned to Tampa Bay in 1998 where he enjoys fly fishing and the TBFFC. He is currently a member of the TBFFC board of Directors and shares interim presidential duties with Neil Sperling and Dick Miekka. He will show pictures and narrate the Alaskan River float trip he took with several other TBFFC members this summer.

### **Featured Fly Tyer**

**Jeff Janecek**

Jeff Janecek came to Florida in 1979 from Pennsylvania, when there was three feet of snow and the Delaware River was frozen over. He bought a fly rod at Wal-Mart and didn't catch anything for months. Jim Swann took him under his wing and showed him how it's done. Jeff enjoys fishing the Weeki Wachi, Withalacoochee and Rainbow rivers. He likes the challenge of low branches, small pockets and clear water. He will be tying several of his foam patterns that are great producers.

**Directions to Our Meetings:** **From I-75**---Take Bruce B. Downs exit from I-75; go west 2 miles to traffic light, turn left onto Tampa Palms Blvd., then left on Compton Drive, and right at Compton Park. **From I-275**---Take Bearss East to Bruce. B. Downs; then Bruce B. Downs east/north to Tampa Palms Blvd. Rt. on Tampa Palms, then left on Compton Drive and right at Compton Park

## OCTOBER 2008 PRESIDENT'S MESSAGE

Fall has arrived in Tampa Bay, although it may still seem like summer. Soon the waters will cool and fishing will improve dramatically in the flats. I find overall fishing is best when the water is between 70 and 80 degrees F. Sea trout like it a bit cooler, and redfish aren't very temperature sensitive.

Special thanks to **Dr. John Millns** and his assistant for the special skin cancer screening at our September meeting. Those who had no problems were undoubtedly relieved, and those of us who had skin cancer or suspicious areas are thankful that the problems were caught. This is a life saving event.

Thanks to **Ron Cavalier**, our tyer of the month for September. See his mangrove crab recipe on page 7. Ron tied flies for much of the meeting but had to leave a bit early because of another commitment. He gave us some great new tips on speed tying, and will return again this month to finish up, so we will have a double treat with both **Jeff Janecek** and Ron putting on a tying clinic.

Thanks to those who took time to represent our club at the annual Florida Sportsman Show. Your dedication is very much appreciated.

Remember that we have several club outings in the fall, as listed on page 3. Most currently, note that the Carl Hanson outing, our annual friendly competition with the Suncoast Fly Fishers, takes place on October 18. Sign up at the meeting.

Tight Lines. Dick Miekka

## TBFFC CALENDAR OF EVENTS

### 2008 TBFFC MEETING DATES

Here are the meeting dates for the rest of 2008: October 1, November 5, and December 3. **Please watch this space for any changes.**

### OCTOBER "CARL HANSON" OUTING WITH SUNCOAST CLUB

**When:** Sat. October 18, 2007, 8:00 AM -Noon

**Where:** Rotary Park, Hillsboro River

**Includes:** Great Lunch, Beautiful Trophy

**Sign up:** At the October club meeting.

This annual outing gives us a chance to interact with our friendly rivals across the bay, and to compete for the Carl Hanson Trophy for the most fish caught.

The Suncoast Fly Fishers have held trophy for 2006 and 2007, after we held it for 2004 and 2005. It's our turn to win it back!

It is necessary to have a boat, kayak, or canoe to enjoy the beautiful scenery of the Hillsboro River, and to fish for the many pan fish and bass in the river. Sign up at the October meeting. We will pair up boat/canoe owners with those needing transportation on the river. The Suncoast Fly Fishers club is Host this year, so we get a nice lunch with no work.

For more info call Dick Miekka at **727-866-8682**.

### BIG GUN SHOOTOUT SET FOR NOVEMBER 9

**When:** Sunday, November 9, 9:00 a.m. until 2:00 p.m.

**Where:** Picnic Island Park, (follow signs near the southern end of Westshore) We will be at the first parking area beyond the boat dock turnoffs.

**What:** This is an annual event in which our club hosts surrounding clubs in a friendly competition of fly-casting skills. There are five casting accuracy tests, including the infamous Hanson cup, and one distance casting test. The few contestants who manage a 100 ft. cast during the regular competition are invited to compete in the final event, a shootout for the top distance prize. Trophies are awarded for individual and team (of 3) performances and a great lunch

**Judging:** Please plan to do a bit of judging (which is fun), so that everyone can participate in the event. In the past, some judges were unable to compete, because nobody was available to share the judging duties.

### ADDITIONAL TBFFC EVENTS

1. **Play Hooky for the Holidays:** An annual event scheduled for Friday, December 5
2. **Outing with the Mangrove Club.** Held each fall. Mangrove Club is host this year. No schedule as yet.
3. **Don Coleman memorial outing** at Ft. DeSoto Park, hosted by the Suncoast Fly Fishers, December 20.
4. **Our Banquet was moved to March 14, 2009.** More details later.

### FLY FISHING CHALLENGE NOVEMBER 1

The Mangrove Coast Fly Fishers and Sarasota Chapter of the Coastal Conservation will hold the fourth annual Fall Fly Fishing Challenge on Saturday, Nov. 1, 2008 out of the Ken

Thompson Park boat ramp on City Island in Sarasota. The catch, photo and release event will feature an Open Division and a Fly Angler Division Those in the Fly Angler Division will fish for a variety of species, including snook, redfish, spotted seatrout, bluefish, ladyfish, flounder, snapper, jack crevalle, pompano and permit. Each species in the Fly Angler Division will have a designated point value. The Entry fee is \$50 and includes an awards barbeque. Applications are available at area tackle shops or on line at the following links, <http://mangrovecoastflyfishers.com/tournaments.php> Call Rick Grasset at 923-7799 or e-mail [snookfin@aol.com](mailto:snookfin@aol.com) for more info.

### BILL JACKSON'S EVENTS OF INTEREST

Call (727) 576-4169 for all items listed below.

Fly casting clinics each Saturday at 10 AM

Fly Tying Clinics; 6:30 PM every Monday for beginners and every Wednesday for advanced tiers.

### SUNCOAST FLY FISHERS

[www.suncoastflyfishers.com](http://www.suncoastflyfishers.com)

Regular Meetings: 6:30pm on the Third Thursday of each month, **except December**, at Walter Fuller Recreation Center, 7883 26<sup>th</sup> Ave. N., St. Pete.

### MANGROVE COAST FLY FISHERS

[www.mangrovecoastflyfishers.com](http://www.mangrovecoastflyfishers.com)

NOTE: Newer Location for MCFE Club meetings - **Twin Lakes Park**. The entrance to Twin Lakes Park in Sarasota is located on Clark Road, just 1/2 mile east of I-75, on the south (right) side of the road. Contact website above for details and directions.

New Ideas &  
Full Color Print Solutions.

Great People. Great Solutions.

## **TIPS FOR TBFFC – No. 4**

### **Vigilance**

By Dr. John Millns

Another hot summer is past and autumn is slowly drifting in as mother-nature winds down for another year. Here in Florida and the surrounding Caribbean basin, however, the ultraviolet radiation remains intense throughout the year; as much as 5 times that found on the latitude of Chicago, Detroit or New York City. Living and playing in this environment requires a protective vigilance like few other places. It is well known that chronic sun exposure accelerates aging changes in the skin, i.e.: yellowing, thinning, wrinkling, increase in spider veins, ruddy brown mottled discoloration on the neck and chest and thick furrowed wrinkling on the back of the neck often known as “sailor’s neck”. Above and beyond these changes, however, is the threat of cancer that lurks in the background. According to the National Cancer Institute’s Surveillance Epidemiology and End Results (SEER) data base, the average American’s estimated life-time risk of invasive melanoma has grown from 1 in 1,500 in 1935 to 1 in 60 in 2006. Melanoma is now the second most common cancer in women in their 20’s. The American Cancer Society figures show the number of estimated new melanoma cases has grown from 54,200 in 2003 to 62,480 in 2008. During that same period yearly melanoma deaths are expected to rise from 76,000 to 84,020. In a similar vein, the incidence of non-melanomatous skin cancer i.e. basal cell carcinoma and squamous cell carcinoma has increased as well. Over 1,000,000 people will develop one of these cancers in the coming year. Between 40 and 50% of Americans who live to age 65 will have either skin cancer at least once. About 90% of non-melanoma skin cancers are associated with exposure to ultraviolet (UV) irradiation.

Because of this ongoing threat of skin cancer, surveillance and skin protection have become paramount. At the top of the protection ladder, sunscreens and sunblocks have become a keystone in the protection parameter. Last summer, the Environmental Working Group (EWG), a Washington, D.C. non-profit organization, released a rating of sunscreen products based on safety and efficacy. The methodology involved a review of nearly 400 peer-reviewed studies of approved sunscreen chemicals and an analysis of the ingredient toxicity. Wide media dissemination of the study raised awareness about sunscreens in general. Top rated sunscreens from EWG’s data base: California Baby SPF 30+ sunblock stick (no fragrance and every day/year around); Badger SPF 30; Keys Solar RX therapeutic sunblock SPF30; and Trukid Sunny Day Face stick SPF30. It is important to look for products with SPF of at least 30 and broad UVA/UVB coverage. These can be physical blocking agents such as Titanium Dioxide and Zinc Oxide or chemical products such as Avobenzone or Mexoryl. Look for products with Avobenzone or Parsol and with stabilizing vehicles such as Helioplex. Consumer Reports Magazine recently hired a lab to evaluate 19 sunscreens and rated 2 as fine options. Neutrogena Ultra Sheer, now available in SPF80 and No-AD sunblock lotion maximum SPF45. New Mexoryl containing products are attracting wide attention as alternatives to the other sunblocks that contain agents that could theoretically have adverse affects.

In April, the FDA approved LaRoche-Posay’s anthelios 40 sunscreen with Mexoryl SX recommending it as low hazard. While there is no “one-size fits all” solution for sun protectants, stick products may work better for the face of children and tennis players and possibly fisherman as an agent that does not drip or run while clear gel products may be better fit for people with oily skin or acne. Surfers and swimmers do better with sunblocks that will with-stand water.

Do not forget the use of sunscreen chap-stick or lip protection as cancers that arise on the oral mucosal areas are often aggressive with a tendency to metastasize. The American Academy of Dermatology recommends re-applying sunscreens and sunblocks every 2 hours to help achieve the greatest success.

As an alternative or a supplement to the use of sunscreens and sunblocks, protective clothing has become an important aid for those spending a great deal of time in the sun. Fishermen have been aware of sun protective clothing for decades but it is only now catching on in the general population. Clothing lines that used to be hot, bulky and occlusive have now entered the 21<sup>st</sup> century and many companies are making products that are extremely effective at sunblockage and nice looking as well. Several companies that have recently entered the market include Sun Precautions 1-800-882-7860, [www.sunprecautions.com](http://www.sunprecautions.com), Coolibar 1-800-926-6509, [www.coolibar.com](http://www.coolibar.com), Sun Day afternoons 1-888-874-2642, [www.sundayafternoons.com](http://www.sundayafternoons.com), Tilley Hats 1-800-363-8737, [www.Tilley.com](http://www.Tilley.com), Ex Officio 1-800-644-7303, [info@exofficio.com](mailto:info@exofficio.com), Sun Protective Clothing LTD. 1-800-353-8778, [www.sunprotection@sympatico.com](mailto:www.sunprotection@sympatico.com), Sun Grubbies 1-888-970-1600, [www.thefalls@sungrubbies.com](mailto:www.thefalls@sungrubbies.com), Solartex 1-877-476-5789, [infor@solartex.com](mailto:infor@solartex.com), Solar Eclipse 1-800-878-9600 [sales@solareclipse.com](mailto:sales@solareclipse.com), Columbia Sportswear 1-503-985-4000, [www.columbiasportswear.com](http://www.columbiasportswear.com). Similar products are now carried by large chains such as Cabelas, Bass Pro and many fly fishing catalogues. Many clothing supplements are available as well such as sun protective scarves, face masks, ear protectors, nose protectors and gloves. The advantage of clothing protection is that it does not wash off, it does not need to be applied an hour prior to activities and does not need re-applying every 2 hours like sunscreens and sunblocks. Sunglasses with UVA/UVB coatings help prevent cataracts.

The final piece to the puzzle is surveillance. We had a healthy turn-out for the skin cancer screening at the last meeting and this certainly reflects a high degree of awareness and concern in our club population. Do not, however, rely on a once a year check alone to insure your safety. Everyone is advised to perform self skin exams on a monthly basis to increase the chances of finding an ominous lesion in time to have it removed without significant risk.

Member photos, October 2008

Four friends invited **Jack Hexter** (pictured above left) offshore for a day of blue water fishing on September 7. First stop was some 50 miles offshore, and their search for fish ultimately carried them 65 miles from home. They caught and released numerous red snapper, which were out of season, but kept 24 gag grouper, 1 red grouper, 2 amberjack, 25 mango snappers and a cobia. Quite a haul!

Seven TBFFC members / spouses (**Frank Rhodes, Walt and Lou Durkin, Steve and Amber Parker, and Wes and Kelly Sobczak**) went on a summer Alaska raft trip, floating down 56 miles of river through sometimes class three rapids. They camped along the river bank, often on bear trails, and caught all five varieties of salmon as well as rainbows and grayling. Get the complete story of this idyllic trip from Walt at the October 1 TBFFC meeting.

## *From Lloyd and Arlene Bull on our British Columbia trip, 2008*

**In July** Arlene and I headed for British Columbia to fish some of the world renowned rivers of that Province. We were headed for an area just south of the Alaskan Panhandle where we were told was some of the most scenic areas of North America. They were right. During our entire trip of 1200 miles we were never out of sight of snow topped mountains and beautiful rivers full of huge salmon.

We flew into Terrace, then east to Smithers where we spent three days exploring the area and fishing remote areas of the Bulkley and Morice Rivers in an area where logging was in full force. We took a day to head east 45 miles on gravel roads to Babine Lake where there is some of the area's best Rainbow trout fishing but were deterred from fishing due to heavy rainfall.

We next went north to spend 3 days fishing the Kispiox River. We stayed in a nice cabin where a resident bear yearling cub entertained Arlene each morning. We floated the Kispiox, which is noted as the best Steelhead River in Canada but that run comes in the fall so we settled for Chinook Salmon and they were there, lots of them. The entire river is closely wooded by trees and brush on each side with almost no access on the whole river. Fishing is not allowed from floating conveyances so we stopped at likely places to cast. We were in a 13 foot rubber raft and lots of times we were backed right up against the brush. Arlene connected almost immediately with a 30# fish which was duly netted after a 25 minute battle. I hooked a mate while she was playing her fish and we had our hands full keeping them apart.

All day for the next 2 days we connected with big fish averaging 30 to 45 pounds and they are tough in the fast waters of the river. The climax came on the last day on the last pool where I hooked a huge fish estimated at over 60# that took off down river into rapids where he spooled me and was gone. It was three days of really great fishing. You will need Lead Core or T1400 sinking tips to get down as the salmon stay right near the bottom. You can also catch them on spinning gear with Little Cleo spoons in chartreuse as the best color. We fished both ways to save my arms some as they were being given a real workout.

We then traveled north to the Alaskan border at Stewart-Hyder so that Arlene could see the bears which they advertise. The salmon were not running in the stream so no bears but we saw two on the roads. There is no Border Crossing Control going into Hyder as there are no roads to leave from except back into Stewart, B.C. where you must clear Customs coming back in.

We then traveled 240 miles to Prince Rupert where we took a day's boat trip north along the coast toward Alaska for a Bear Viewing trip where we took some great pictures of bears and the scenery. In the town I tripped on an uneven sidewalk and fell doing severe damage to my left arm and shoulder and spent the rest of the day in the Emergency room.

We then went back the 75 miles to Terrace where we had planned a trip on the Skeena River for Chinook, Coho and Sockeye Salmon. Arlene caught one Coho and several Chinooks but our efforts at fly fishing for Sockeyes were futile. They just wouldn't hit the fly.

The Chinooks on the Skeena were fresh fish and full of fight. The river is fast and deep and those fish fought us down until our arms ached. I had not fished as my arm and shoulder were in bad shape but when Arlene begged me to take the rod after fighting a fish for 40 minutes I relented and eventually brought the fish in. It was 50# and no sooner in the boat when she had another one on. This one I had to take over too as her arms had given out entirely. We eventually had to release the anchor and follow the fish before we could get near enough to net it. It was 55# and a bright silver fresh run fish with lots of fight. It is now a week later and I am still paying for the battle it gave me.

The enclosed pictures are of Arlene on the Kispiox and me with the 55# fish on the Skeena. The jacket does not show my arm bandaged from above the elbow to the wrist but I've always told you nothing will stop me from fishing and I landed both of those fish with virtually one arm.

Our trip was everything we had anticipated: Great scenery, wonderful fishing and more memories for when we get old. We will be glad to give anyone the information we have gathered on our trip.

Just ask 🍷

## **FLY OF THE MONTH**

### **Common mud or Mangrove Crab Fly**

As tied by Ron Cavalier

#### **Tying Instructions:**

Use any hook you like, I tie them from a size to a 2/0, the larger hook for tarpon. Place hook in your vise and wrap the thread along the shank of the hook into the bend.

Tie in a small batch of DNA holo fusion, fish hair or arctic fox (your choice), and wrap part way up the bend of the hook.

Tie in legs 2 each side for small crabs 3 for larger crabs. Length is a matter of choice.

Tie in eyes on top of the hook, lead eyes or whatever eyes and size you'll need to make the fly turn hook point up, the larger the pattern the larger the eyes

Tie in body fur of whatever color you choose to make the crab. Begin wrapping the fur over the tail and legs, keeping each wrap close but not too tight to one another, which causes the body to be too dense which makes it harder to sink.

Take a small comb and comb material back toward the point of the hook and form a round or oblong body. Use Softex with a bodkin and apply a tad of Softex to the upper body and spread it from the shank of the hook outward to either side. Use your thumb and forefinger to squeeze into a flat, round shape. When dried (about 5 minutes) trim fly to desired shape.

**The completed fly** is as close to a real crab as any patterns I've seen to date without having to go to tying extremes. It's simple and its life like. In the water with the legs back and upward a tad, it appears to be a fleeing crab.

#### **Tying notes:**

- Use large gap hooks for better hook ups. Tie legs and tails higher into the bend to make fly settle more evenly in the water column.
- Use heavy enough eyes to make fly sink faster.
- Soak flies before using as the material is bulky and takes a moment to soak in, which causes the crab to float longer.
- To make larger crabs, I use a weighted hook (1/16 oz) in size 1/0 or 2/0 and I wrap the weighted area with a size "A" rod wrapping thread to keep the body fur from slipping. This also causes the body of the crab to become larger. Coat the thread with super glue to keep the thread tight and you're on your way to creating a crab for tarpon fishing.
- Color of crab and trimming of the fly will give the appearance of just about any of the small animals we are trying to imitate. Experiment and have fun, it's your fly, so go for it.

#### **About Crabs**

Crabs are little creatures that inhabit the Gulf and Atlantic Coast here in Florida. Most fly fisherman either have used a crab pattern or tied one, often with difficulty. After tying many different patterns, I finally hit on the above way to tie a crab fly that is not only simple, but also replicates most of the crabs that live our waters.

So, the next time you're looking for a simple way to tie a crab, get some body fur and use your imagination, look up the colors of the crabs in your area, find a supplier of body fur and have some fun. I tie them as small as 1/2" across for all inshore fish, including bonefish to 1 1/2" x 1 1/2" for tarpon. 🦀

## ***Fishing Report and Forecast*** ***“What a great time to go fishing!”***

Capt Rick Grasset reports trout up to 4 ½ pounds were caught on Clouser flies on the west side of Sarasota Bay near Buttonwood Harbor and Long Bar. He also reports tarpon and snook are being taken on Grasset’s glass minnow. Snook were caught fishing docks on the north end of Siesta Key using Grasset’s Snook Minnow.

Walt Durkin, Leigh West and Dick Miekka tried their luck wade fishing at Picnic Island on Sunday, September 14, during a high tide. After changing flies numerous times, and moving great distances along the waterway, they managed to catch one snook, two small ladyfish, one needlefish and one ballyhoo. The park closes at sundown, so they had to leave before the best twilight fishing time. You can’t win ‘em all.

Several member trips are being planned for the coming weeks. I look for reports from all of you that will be going on the trips.

The month of October looks good for snook, sea trout, blues, pompano, ladyfish and reds.

Tight Lines

Bob

[Rjgaulin@yahoo.com](mailto:Rjgaulin@yahoo.com) 

## ***Project Healing Waters Update for*** ***September, 2008***

Every visit gets better and better. After every session there are plenty of phone conversations with all volunteers (including members of the Suncoast Fly Fishers) to get input on how to make this a great experience for our veterans. Everyone’s support is welcomed, including donating old rods, fly vices and material. If you would like to help, just bring the items to Jeff Janecek at the next club meeting. Members are also welcome to come to our veteran sessions to see what we are doing and to join in. Thanks for all the volunteers support.

//Jeff Janecek

## Member Benefits

TBFFC is famous for its value and focus on the sharing of information, experience, and craftsmanship with its members. As a TBFFC member you will enjoy many benefits free or at nominal cost, plus enriching experiences.

- Monthly Meetings with Famous Speakers
- Fly Fishing Outings
- Fishing Trips Sponsored by Members and the Club
- Group Clinics and Workshops
- Fly Tying Lessons
- One-On-One Fly Casting Lessons
- Shirts and Hats with club logo
- 80 Page Beginner's Basic Skills Instruction Manual
- Annual Banquet with International Speakers
