

The Tampa Bay Fly Fishing Club

www.tbffc.org

Next Meeting: Wednesday, February 3, 2010, 6:00 p.m.

Location: Compton Park Recreation Center, Tampa Palms (See below for Directions)

Invited Speakers

Captains Bryon Chamberlain, Pat Damico and Frank Rhodes

Last March, these three intrepid flyfishers flew to Cancun and then ventured another 4 hours by van to Costa de Cocos, just north of the Belize border. They will present a power point presentation of their enjoyable adventure. Accommodations, guides, food and hospitality were superb and the fishing was great. Bonefish were the primary quarry but permit and tarpon also offered sight fishing opportunities. They will discuss tactics for success. You will love their fact filled presentation spiced with more than a few humorous episodes.

Featured Fly Tyers

Bryon Chamberlain and Pat Damico

Captain Bryon Chamberlain will tie a simple but effective crab pattern that brought a beautiful permit to the boat for some photos during their first few hours of fishing on this trip. He will discuss how to use this effectively for bonefish and tough Tampa Bay redfish.

A Crazy Charlie bonefish fly and its variations will be tied by Captain Pat Damico. This simple pattern is a standard everywhere bonefish are pursued. Redfish also find variations of this pattern hard to resist when properly presented.

FEBRUARY 2010 PRESIDENT’S MESSAGE

Dear Fly Fishers,

Welcome to February and hope you are getting in some fishing in between the cold fronts. Negative low tides this month provide good conditions for sight fishing the flats. Check out the low incoming tide and watch for fish moving up on the flat to feed. The American Legion, Cypress Street and Picnic Island are all good locations.

Thanks to our January speaker, **Kevin Howell** for his engaging talk on Argentine fly-fishing. Thanks also to **Jeff Janecek** who once again taught us how to tie a very productive fly.

Hope to see you all at the Shad outing, postponed to 5-7 February due to poor conditions in January. Look for details in the newsletter. **Also, mark your calendar for our annual banquet on 25 March at the Columbia Restaurant in Ybor City.** This will be a great venue for good food and fun and the opportunity to buy some neat stuff at the auction. We are looking for items for the auction, so see any board member with your ideas.

All for now and tight lines. //Walt

TIPS FOR TBFFC – No. 20

Casting Tip for TBFFC: 3

The second Essential to cast effectively is dealing with Slack. Slack line should be kept to an absolute minimum. Many casting coaches feel this is one of the most important Essentials. When learning to cast, or while practicing, use only your casting hand and pin the fly line to the cork grip with your fingers. If the line should slip while casting, your cast will usually collapse because of slack. Lefty says that the cast begins when the fly starts to move. Having your fly rod tip down close to the water will allow this to happen and will correct many casting errors. Keep line and rod in a straight line. Most people start their cast with the rod tip elevated building slack into the start of a cast and making a good backcast difficult. Other causes of slack are: movement of the fly line by outside forces such as the wind or water, rough, jerky application of power, and poor timing between the backward and forward cast. Placing your casting side foot a little rearward will allow you to watch your backcast. Make sure you can control and minimize slack before introducing the use of your line hand otherwise you will compound the problem.

The Eyes Have It

Here's a link for fly tiers to purchase 3-D Eyes at a great price. Most 3-D Eyes are \$2.50 or more for a pack of 20. These come in sheets of 100 to 500 depending on size and sell for \$7.00 + depending on size and color. I got the "combo pack" in 4 colors and 4 sizes for \$7.00. They seem to run small in size, thus a 5mm is what usually would be considered a 4mm. For those that use them, it's a great value.

Island Earth Day Festival

I'm writing you on behalf of Honeymoon Island State Park in Dunedin, FL. We wanted to let you know about our upcoming Island Earth Days festival on April 17th and 18th! Each year we dedicate a large section of the festival to environmental education and outreach. We call this area Osprey Village. We invite state and local non-profit environmental organizations to accept a booth in Osprey Village where they present a hands-on presentation for community members (children and adults) which promotes environmental awareness. This year we were hoping to include more local adventure and outdoor fitness clubs into Osprey village. We understand that, for many of you, your focus is on planning and implementing outings. Therefore, instead of requiring you to prepare an interactive demonstration, we would like to have an area dedicated solely to outdoor clubs. We will provide tables and you will be welcome to bring photos and information on your group. This arrangement will require minimal volunteers/resources on your part, and will allow park patrons access to outdoor adventure opportunities. If you *would* like to give a demo related to your club's activities, we certainly encourage it! Our goal is the promotion of environmental appreciation, and as you all know, getting out and enjoying nature helps us to see it's great value! I have attached our exhibitor application,

which contains further details on the event. Please feel free to contact me with any questions. I hope to see many of you for a fun-filled weekend in April!

FLY OF THE MONTH

Leech Pattern

As Tied by Jeff Janecek

See Page 5 for some fish caught on this fly.

Materials:

Hook: Size 8, regular

Thread: Black

Eyes: Small red lead eyes

Body and Tail: 1/8 inch wide black rabbit zonker strip.

Instructions:

1. Place #8 hook in vice, facing down and tie red (size small) lead eye 1/8 back from hook eye.
2. Rotate with point facing up, tie black zonker strip around 2 inches long from hook bend, with fur facing the bottom of the hook. (part hair, put a drop of water in area).
3. Wrap thread, packing down the fur, till there is just thread showing; up to the lead eye.
4. Skin side of zonker strip should be wrapped or palmered facing hook, shank very tightly.
5. Wrap till up to lead eye, place fur over eye center, wrap the 1/8 inch space available behind hook eye tightly with thread.
6. Cut remaining zonker strip off, Trim fur around hook eye. Wrap thread back and forth to cover any remaining fur.
7. Whip finish several times. No glue.

Hints-I like to use 1/8 wide zonker strips in black. Fur is 1/2 tall. Medium eyes can give it more action and sink faster but lands louder and is harder to cast. Sometimes this works better, however. 🌅

Fishing Report and Forecast

“What a great time to go fishing!”

The month of January has been one to remember for the cold weather we experienced. That is the reason why not many fishes were caught. As I sit here tonight January 18, I have yet to receive one report. But with the warming of the water the last few days I believe the action will pick-up.

Robert Fisher, Lance Pocock and I fished the canals in North East St Pete last Thursday Jan 15 and caught a few trout on conventional rod and reel using Berkley Gulp and working them very very slow. Robert did eventually use his fly rod and caught a 14” trout. The water was in the low 50 degrees and we saw a lot of dead fish.

John and Joan Willis fishing the Chassahowitzka Thursday January 14th did fairly well according to John. Using small clouser that John tied, Joan caught a nice one pound bass and each caught several ladyfish and mangrove snappers. All fish were caught and released.

Leigh West reports red fishing is pretty decent in the cold water. He reports sight fished and caught two a 24” and a 31” on the 16th of January.

Capt. Rick Grasset reports the action pick up Jan . 17th. Dave Wahl from Il. Fishing north Sarasota Bay near Long Bar caught and released about 10 trout on clouser flies including a 3 pounder that he sight fished out of a pothole.

With the full moon on Jan. 30th I’m told the tide should be favorable for trout and redfish in skinny water. Have fun fly fishing and go out and catch a few. Good Luck. SEND THOSE GOOD REPORTS IN.
